

The Fillmore Silver Spring

J.E. Richards Electric, Inc. performed an electrical renovation and addition to the former JC Penny store for a new night club/live music venue. The building is a three-story steel structure with one excavated below-ground level, totaling approximately 28,000 sq. ft. Included was a new storefront, entry doors/vestibule, ticket windows, and signage addition.

The interior fit-out is all new electrical/fire alarm/specialty lighting, along with new restrooms and finishes consistent with a night club/music venue.

The Fillmore of Silver Spring brings a dynamic, first-class music, entertainment, and community use venue to downtown Silver Spring, MD, in partnership with Montgomery County.
