

VDOT New Building

A new, out-of-the-ground building for Virginia state government employees, primarily VDOT and Virginia State Police. J.E. Richards Electric, Inc. completed the tenant fit-out, which included all electrical, telephone, data, and access control work. The electrical scope of work included providing and installing a 500kW generator, four ATS's, complete FA system, a lighting control system for the entire building and 25, 30' light poles for parking lot lighting.
