

1776 Wilson Blvd

J.E. Richards Electric, Inc. provided electrical installation services for this new 94,000 sq. ft. base building with multiple tenant fit-outs. The installation included a solar power system on the roof of the structure, electrical vehicle charging stations, 500' of busway, a complete fire alarm system, a 350kW generator, three ATS's, primary electrical service VEPCO duct bank, multiple floor outlets, and heat trace cabling.

Market:

Commercial & Entertainment

Date:

2012

Location:

Arlington, VA

There were also 3 levels of underground parking that required electrical power for lighting, elevators, exhaust fans, and unit heaters.

This project was certified LEED Silver.
